BY MERITS AND DEMERITS.

Santa Fe Employees Work Under the Brown System of Discipline.

RULES TO BE OBSERVED.

From Kansas City, Mo.—The "discipline by record" system, as the Brown merit system is called on the Santa Fe railway, has been in force a little over two months on that road, and it is pronounced a success. Officers say the men work hard to keep their records free from demerit marks, and many advantages result from the system. It has proved especially effective for retaining the old employees, and it saves the men much time which they lost under the old system of "laying off" as punishment for failing to observe the rules.

Under the old system, for petty offenses, men received suspension for a period of so many days, losing their time while they were absent. Under the Brown system, they are suspended for the same number of days as was the length of the sentence, but the suspension, instead of being annual counts in demerit marks, is daily being one mark. When an employee has received many days of record discipline or suspension it is equivalent to a discharge.

The success of the plan is shown by the fact that not a single employee has been discharged for having received an aggregate number of marks.

Now the men have various opportunities for promotion, and the transmissons between stations and the railroads are well-spotted with suspension notices.

The motive behind the names of the employees remaining the marks off records are kept by superintendents. Mr. Gandy, who makes all of the suspensions.

During the first half of the year the records showed 1,000 men suspended, but the second half saw 1,000 more suspended. Suspensions last fall began to increase rapidly, but in November the number of suspended men increased to 1,200.
